## PRESCRIPTION REFILLS

Please don't wait until you run out of medicine to call for a refill. In fact, call at least two days ahead. In order to protect you, your doctor must review your medical file before renewing a prescription. Therefore please do not call for medications after hours or on weekends when records are unavailable. **It could take up to 48 hours after you call before your doctor can review your file and call in any prescription.** The files are reviewed and prescriptions are called to pharmacies at the end of office hours after all patients have been seen. By law, doctors cannot order refills for certain narcotics over the phone. A written prescription is required in those cases. I have read, understand, and agree with the above.

The purpose of this agreement is to give you information about the medications you will be taking for pain management and to assure that you and your physician comply with all state and federal regulations concerning the prescribing of controlled substances. A trial of opioid therapy can be considered for moderate to severe pain with the intent of reducing pain and increasing function. The physician's goal is for you to have the best quality of life possible given the reality of your clinical condition. The success of treatment depends on mutual trust and honesty in the physician/patient relationship and full agreement and understanding of the risks and benefits of using opioids to treat pain.

1. You should use **ONE** physician to prescribe and monitor all opioid medications and adjunctive analgesics.
2. You should use **ONE** pharmacy to obtain all opioid prescriptions and adjunctive analgesics prescribed by your physician.

**Pharmacy:** \_\_\_\_\_ **Phone Number:** \_\_\_\_\_

3. You should inform your physician of all medications you are taking, including herbal remedies, medications, especially cough syrup that contains alcohol, codeine or hydrocodone.
4. You will be seen on a regular basis and given prescriptions for enough medication to last from appointment to appointment, plus usually two to three days extra. This extra medication is **NOT** to be used without the explicit permission of the prescribing physician unless an emergency requires your appointment to be deferred one or two days.
5. Prescriptions for pain medicine or any other prescriptions will be done only during and office visit or during regular office hours. **NO** refills of **ANY** medications will be done during the evening or on weekends.
6. You must bring back **ALL** opioid medications and adjunctive medications prescribed by your physician in the original bottles.
7. You are responsible for keeping your pain medication in a safe and secure place, such as a locked cabinet or safe. You are expected to protect your medications from loss or theft. **Stolen medications should be reported to the police and to your physician immediately!** If your medications are lost, misplaced or stolen, your physician may choose not to replace the medications or to taper and discontinue the medications.
8. You may not give or sell your medications to any other person under any circumstances. If you do, you may endanger that person's health. It is also against the law!

- 
9. Any evidence of drug hoarding, acquisition of any opioid medication or adjunctive analgesia from other physicians (which includes emergency rooms), uncontrolled dose escalation or reduction, loss of prescriptions, or failure to follow the agreement may result in termination of the doctor/patient relationship.
  10. You will communicate fully to your physician to the best of your ability at the initial and all follow-up visits, your pain level and functional activity along with any side effects of the medications. This information allows your physician to adjust your treatment plan accordingly.
  11. You should not use any illicit substances, such as cocaine, marijuana, etc... while taking these medications. This may result in a change to your treatment plan, including safe discontinuation of your opioid medications when applicable or complete termination of the doctor/patient relationship.
  12. The use of alcohol and opioid medication is contraindicated
  13. You agree and understand that your physician reserves the right to perform random unannounced urine drug testing. If requested to provide a urine sample, you agree to cooperate. If you decide not to provide a urine sample, you understand that your doctor may change your treatment plan, including safe discontinuation of your opioid medications when applicable or complete termination of the doctor/patient relationship. The presence of a non-prescribed drug(s) or illicit drug(s) in the urine can be grounds for termination of the doctor/patient relationship. Urine drug testing is not forensic testing, but is done for your benefit as a diagnostic tool and in accordance with certain legal and regulatory materials on the use of controlled substances to treat pain.
  14. There are side effects with opioid therapy, which may include, but not exclusively, skin rash, constipation, sexual dysfunction, sleeping abnormalities, sweating, edema, sedation, or the possibility of impaired cognitive (mental status) and/or motor ability. Overuse of opioids can cause decreased respiration (breathing)
  15. Physical dependence and/or tolerance can occur with the use of opioid medication.

**Physical dependence** means that if the opioid medication is abruptly stopped or not taken as directed, a withdrawal symptom can occur. This is a normal physiological response. The withdrawal syndrome could include, but not exclusively, sweating, nervousness, abdominal cramps, diarrhea, chills, and alterations in ones mood.

**It should be noted the physical dependence does not equal addiction.** One can be dependent on insulin to treat diabetes or dependent on prednisone (steroids) to treat asthma, but one is not addicted to the insulin or prednisone.

Addiction is a primary, chronic neurobiological disease with genetic, psychosocial and environmental factors influencing its development and manifestation. It is characterized by behavior that includes one or more of the following: impaired control over drug use, compulsive use, continued use despite harm, and cravings. This means the drug decreases ones quality of life.

**Tolerance** means a state of adaption in which exposure to the drug induces changes that result in diminution of one or more of the drugs effects over time. The dose of the opioid may have to be titrated up or down to a dose that produces maximum function and a *realistic* decrease of the patient's pain.

16. If you have a history of alcohol or drug misuse/addiction, you must notify the physician of such history since the treatment with opioids for pain MAY increase the possibility of relapse. A history of addiction does not, in most instances, disqualify one for opioid treatment of pain, but starting or continuing a program for recovery is a must.
17. You agree to allow your physician to contact any health care professional, family member, pharmacy, legal authority, or regulatory agency to obtain or provide information about your care or actions *if the physician feels it necessary*.
18. You agree to a family conference with a close friend or significant other *if the physician feels it necessary*.

I agree to these terms so that David Wall, MD and his staff can provide quality pain management using opioid therapy to decrease my pain and increase my function.
